DESCRIPTION

This concentrated product may be used anywhere that suds cause a problem. A defoamer silicone oil properly emulsified in water to allow the silicone oil to float-out on the surface of the foaming liquid and cancel the foam quickly.

APPLICATION

For use in the pickup tank of steam or hot water extractors.
For use in sewage treatment plants, decorative water fountains and whirlpools.

DIRECTIONS FOR USE

Prior to using wet recovery vacuums:

1. With unit turned on, suck up a small amount of DEFOAMER to coat hose lining.
2. Then pour 2 ounces DEFOAMER into recovery tank.

Defoamer may be used full strength anywhere foam is a problem in such places as water treatment applications, sewers, and drains.
