FLOCCULANTS

SEWAGE PLANT CONDITIONER

FLOCCULANT

Contains biodegradable cleaning agents and/or surfactants. Versatile sewage plant conditioning agent. Enables water to penetrate and wet organic sewage matter for better separation of solids and better digestion. Very effective on solids in lagoons, Imhoff tanks, and open-top digesters. Prevents scum-layer build up. Compatible with enzymes and does not interfere with any reaction process normally encountered in sewage plants.

CLEAN DEFLOCCULANT

Biodegradable Removes organic and inorganic deposits from storm and/or sanitary sewers. Especially effective in the removal of mud and sanitary sewage. A very effective floc stabilizer, increases the settling rate and improves the filtration rate. Destroys the adhesive and cohesive forces of deposits and causes the fine particles to become fluffy and disperse so that they flow easily from the lines.

DESCRIPTION

These sewage plant conditioners chemically break up, clean and remove heavy, dense deposits of mud, silt, sand and sediment from storm sewers, sanitary sewers, and combined storm-sanitary sewers. Biodegradable sewage is formed into a mixture of light weight, fluffy particles that are easily flushed through lines by normal water flow.

APPLICATION

STORM SEWERS • SANITARY SEWERS
COMBINED STORM-SANITARY SEWERS

Effective on solids in lagoons, Imhoff tanks and open top digesters

Removes organic and inorganic deposits

DIRECTIONS FOR USE

Dilute 1 part Flocculant with 4 parts water, spray directly on solids using a Hudson Sprayer. Add 1 pint Flocculant to the sewage daily for each 50,000 gallons of flow, for normal conditions. For best results, allow it to drip into the influent as soon as it enters the plant. More severe conditions may require double the normal recommendation.

SPECIFICATIONS

Packaged: Drums, 5- gallon pail
Appearance: Milky liquid
Fragrance: Characteristic
pH: 7.00
Flash point: None. Non-flammable

PRECAUTIONS

Keep out of reach of children. Keep out of eyes. Do not take internally. Avoid prolonged skin contact. Use with adequate ventilation. Rinse empty container with water and discard. This product is intended for industrial and commercial use and storage by trained service persons only. Manufacturer will not be responsible for any injury, loss, or damage, if product is used in any manner not in compliance with label directions or if precautions are not observed.

FIRST AID

EYES: Flush with large amounts of water for at least 15 minutes; contact physician. IF SWALLOWED: Induce vomiting. Drink large quantities of water. Consult physician. EXTERNAL: Flush with water.
