SPRAY WAX

CAR WASH SPRAY WAX

**ECONOMICAL
CONVENIENT
MULTIPLE USES**

Highly concentrated -- merely one ounce per auto is all that is necessary for a shiny, protected, smear-proof coating on the car.

Works equally well in auto car wash systems as well as hand car washes. New and used car dealerships, service stations, truck and bus fleet maintenance crews and car wash operators find this product a real labor saver at a very competitive price.

**SIMULTANEOUSLY
CLEANS &
POLISHES**

Dust, dirt and grime rinse away easily leaving a protective coating that protects and beautifies the vehicle.

**WILL NOT DULL
OR SMEAR
SURFACES**

Product contains no film-forming ingredients --so it never dulls, waterspots or streaks painted surfaces, windows or chrome.

DESCRIPTION

Spray Wax provides the solution to the problem of a "wet, dripping result" which otherwise necessitates the hand-drying labor cost at the "end-of-the-line." Its unique action breaks the "water sheet" causing it to bead and run off, thus allowing the blower to efficiently grab onto and remove the remaining water particles. This produces a clean, dry and polished auto. The remaining protective coating will protect and beautify the enamel surface to the full satisfaction of the customer.

APPLICATION

Works equally well in siphon systems, pressure systems as well as hand car washing. Another outstanding feature of Spray Wax is that it leaves a coating that is "smear-proof". It will not cause annoying windshield smear when wipers are activated.

DIRECTIONS FOR USE

This product is highly concentrate. One ounce per auto is all that is necessary to "strip" and otherwise break "water sheet" to leave a shiny, protective, smear-proof coating on the car.

The following dilutions are for *starting*, and should be *reduced by further dilution with water* to attain the most economical yet result-producing system.

For SIPHON SYSTEM - Put 5 gallons into a solution with 50 gallons of water for siphoning into spray arch. For PRESSURE SYSTEM - Adjust to force 1 ounce per car into water line servicing spray arch.

SPECIFICATIONS

Packaged:Drums, 5- gallon pail
Appearance: Amber liquid
Fragrance:Characteristic
pH: 8.00
Stability:Excellent
Solubility:Mixes easily
Flash point:None. Non-flammable
Authorization:Requires no authorization by USDA prior to its use in offices and other similar non-processing areas

PRECAUTIONS

Keep out of reach of children. Contains solvent. Possible eye or skin irritant. Keep out of eyes. Do not take internally. Avoid prolonged skin contact. Rinse empty container with water and discard. This product is intended for industrial and commercial use and storage by trained service persons only. Manufacturer will not be responsible for any injury, loss, or damage, if product is used in any manner not in compliance with label directions or if precautions are not observed.

FIRST AID

EYES: Flush with large amounts of water for at least 15 minutes; contact physician. IF SWALLOWED: Induce vomiting. Drink large quantities of water; consult physician. EXTERNAL: Flush with water.
